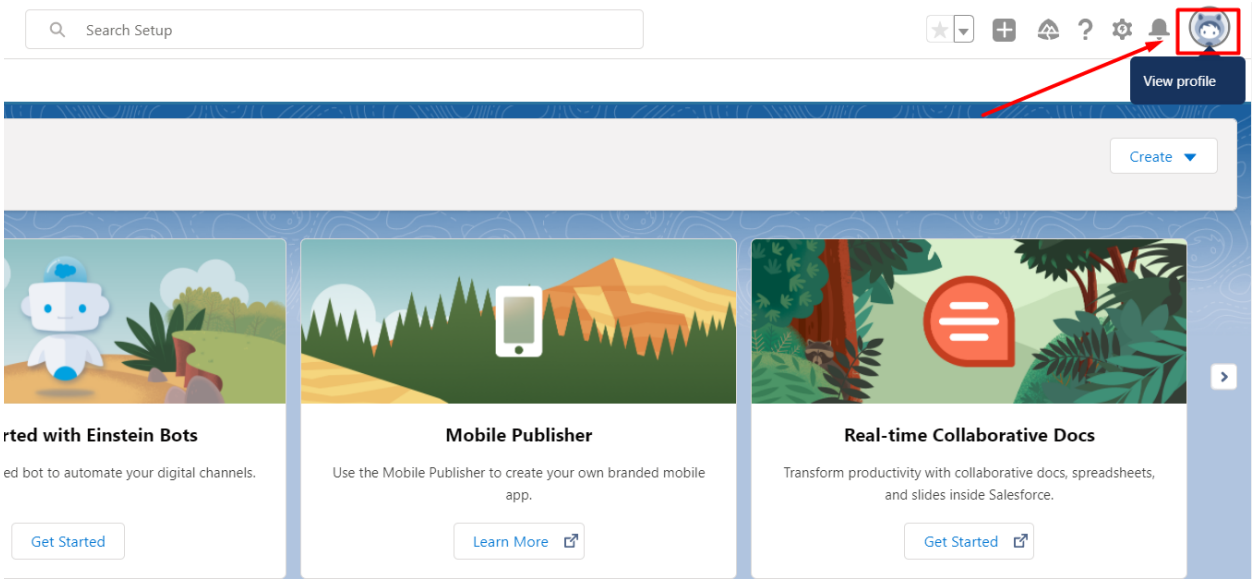
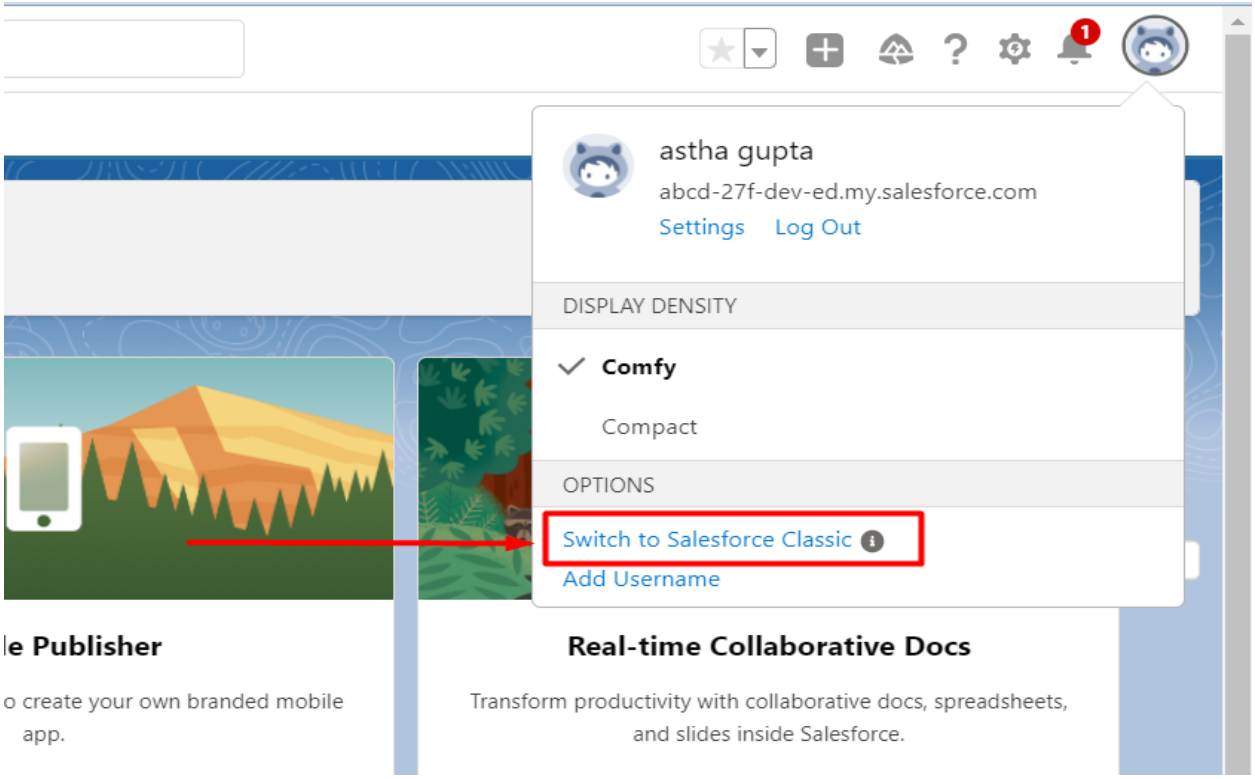
Lecture : 1 Exploring classic salesforce experience:
In this lecture we will learn about classic salesforce experience

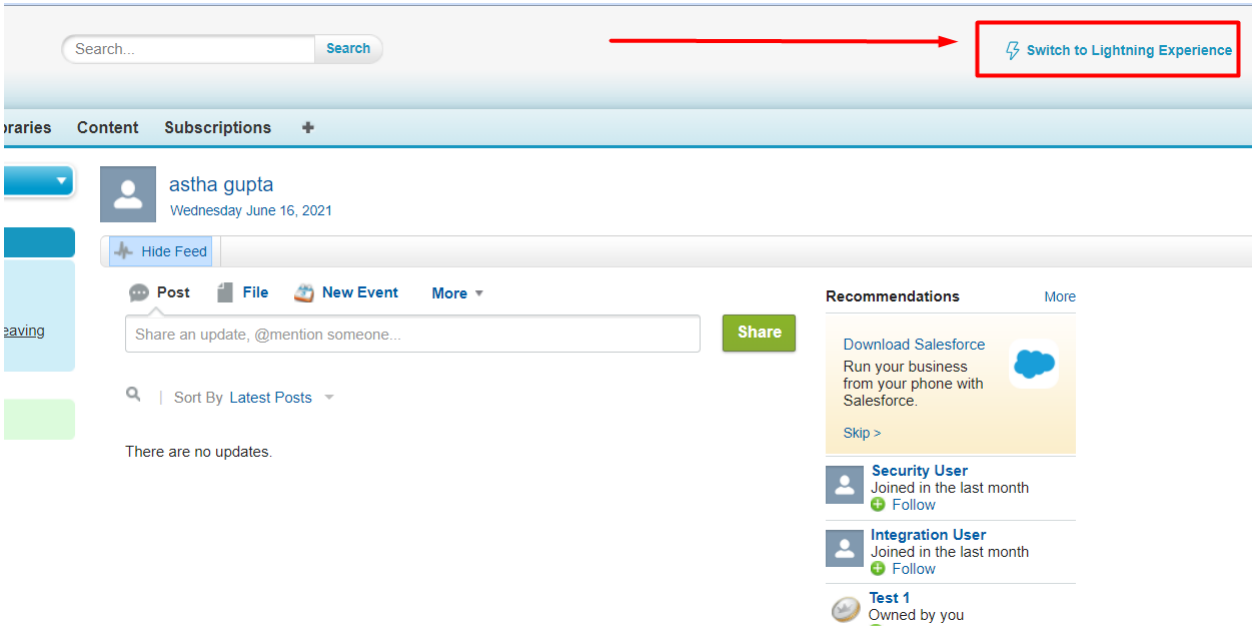
Step 1: In order to switch to the classic version of salesforce you have to click on the icon view profile available on the top right corner of your home page.



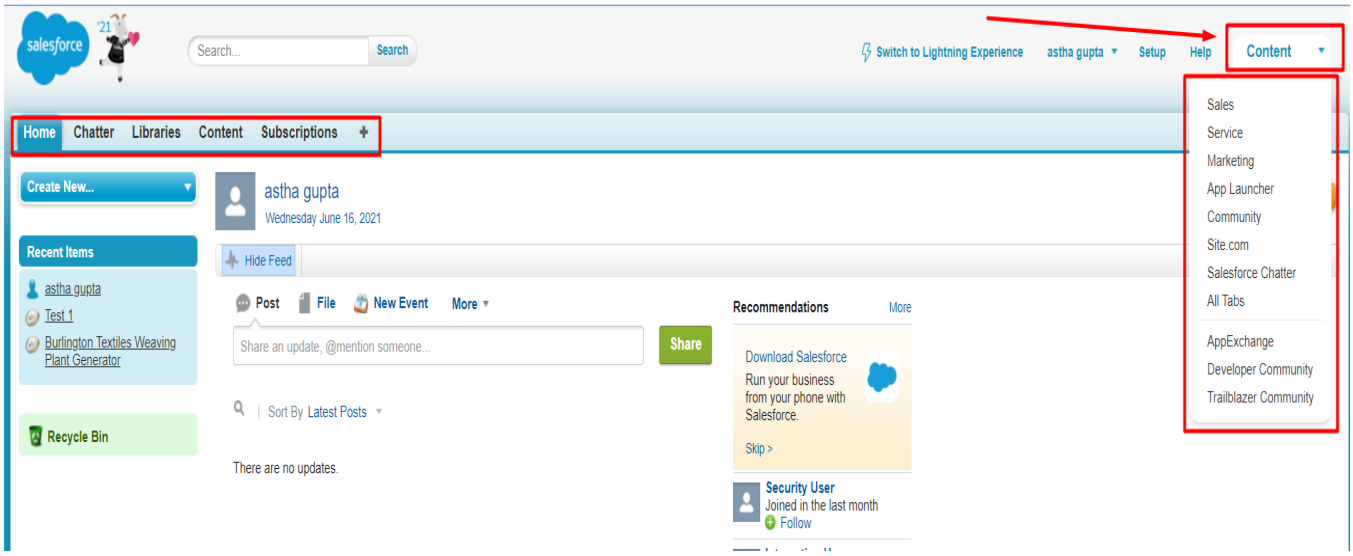
Step 2: Once you click on it you will see an option ‘switch to salesforce classic’ you have to click on this option.



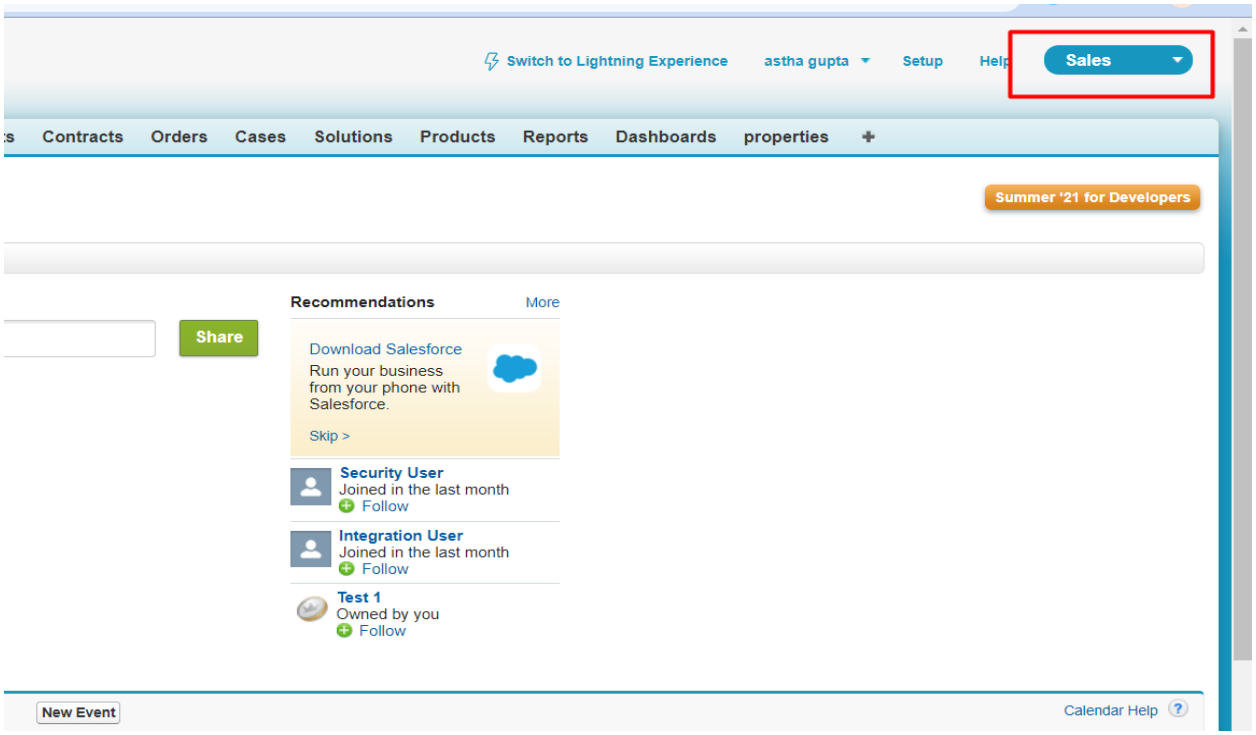
Step 3: As you click on the option you will be directed to the page of salesforce classic if you want to switch back to the lightning experience you will be able to see a link on the top of the page.



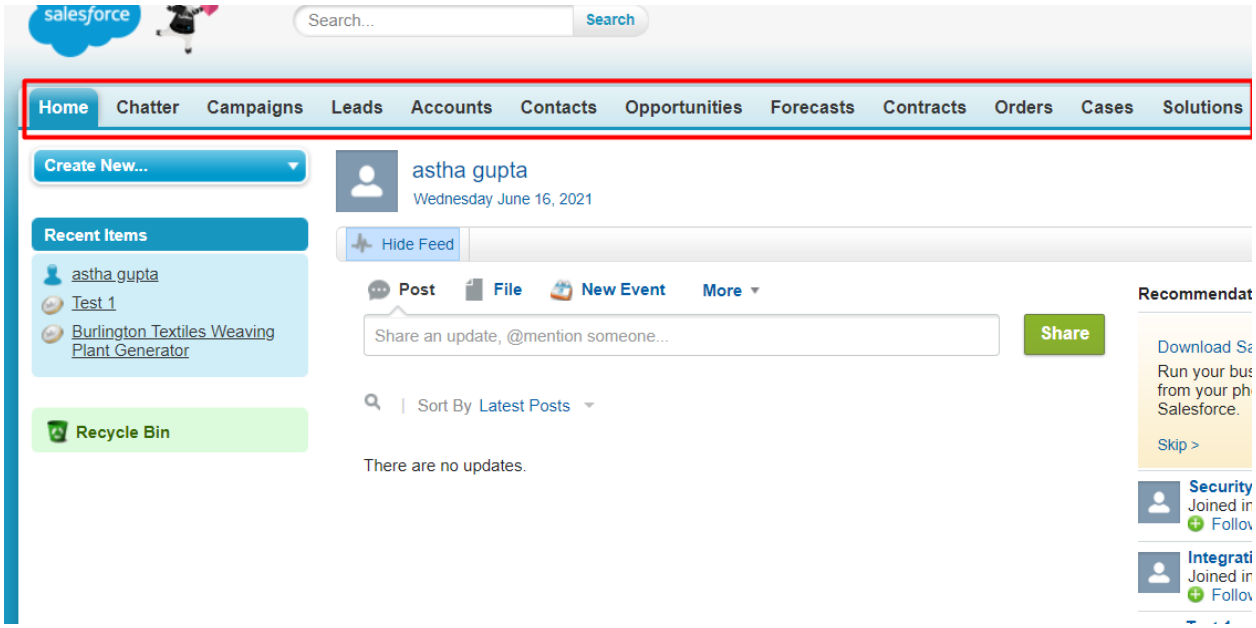
Step 4: On the UI of salesforce classic you can see the navigation bar but in order to switch between apps you can see a tab named content as you click on it you will be able to see all the necessary apps.



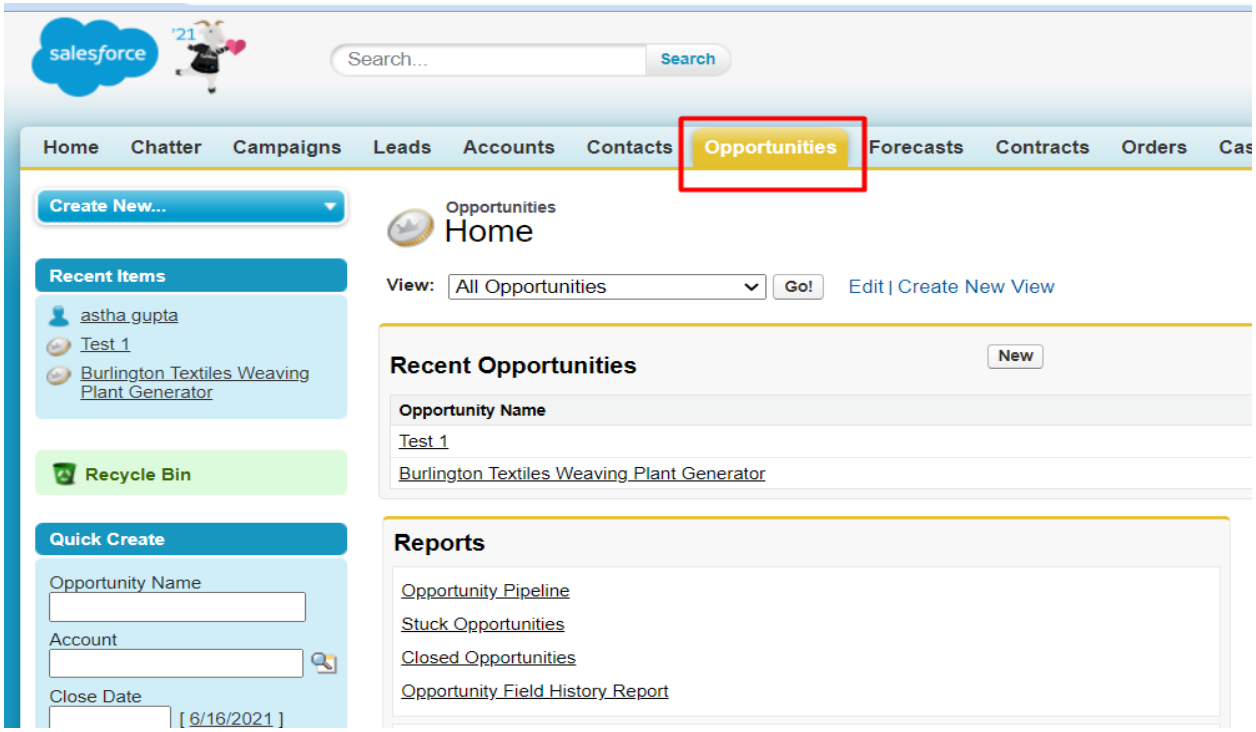
Step 5: As you click on the dropdown you will be shown some apps and some other options such as all tabs etc. If you want to switch to sales option you have to click on that once you click on sales option it will switch from content to sales.



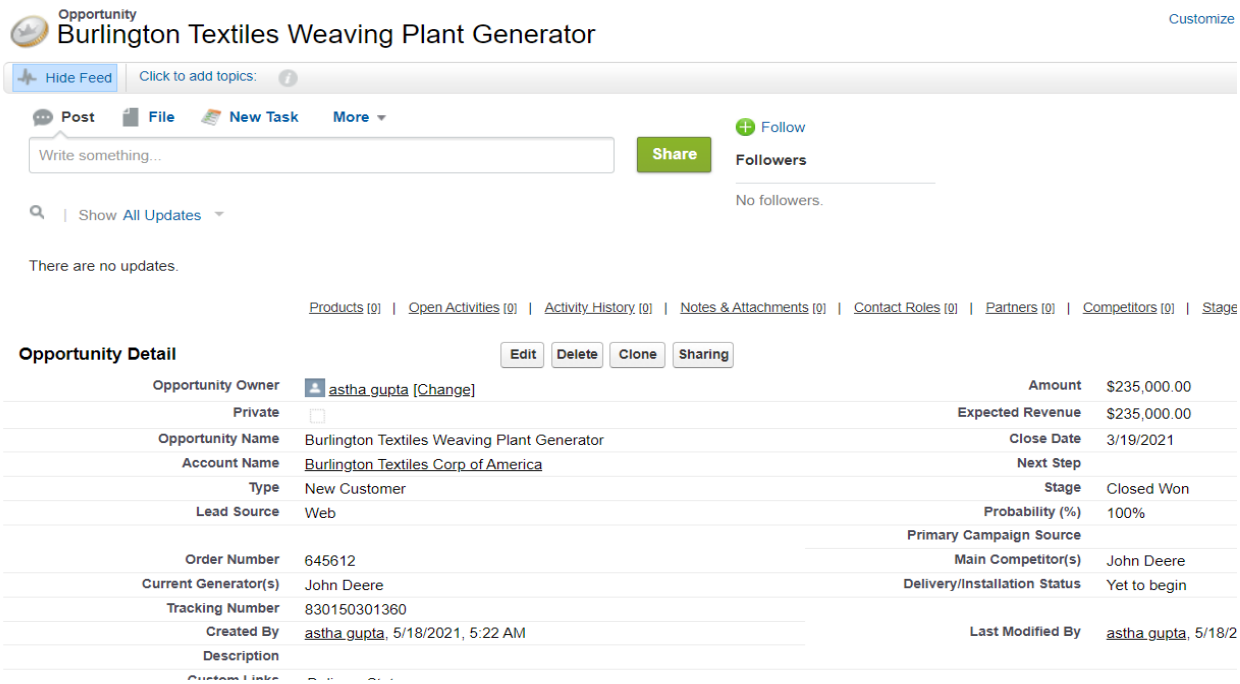
Step 6: As you switch to sales you will now be able to see different apps on the navigation bar such as chatter, accounts, leads, opportunities etc.



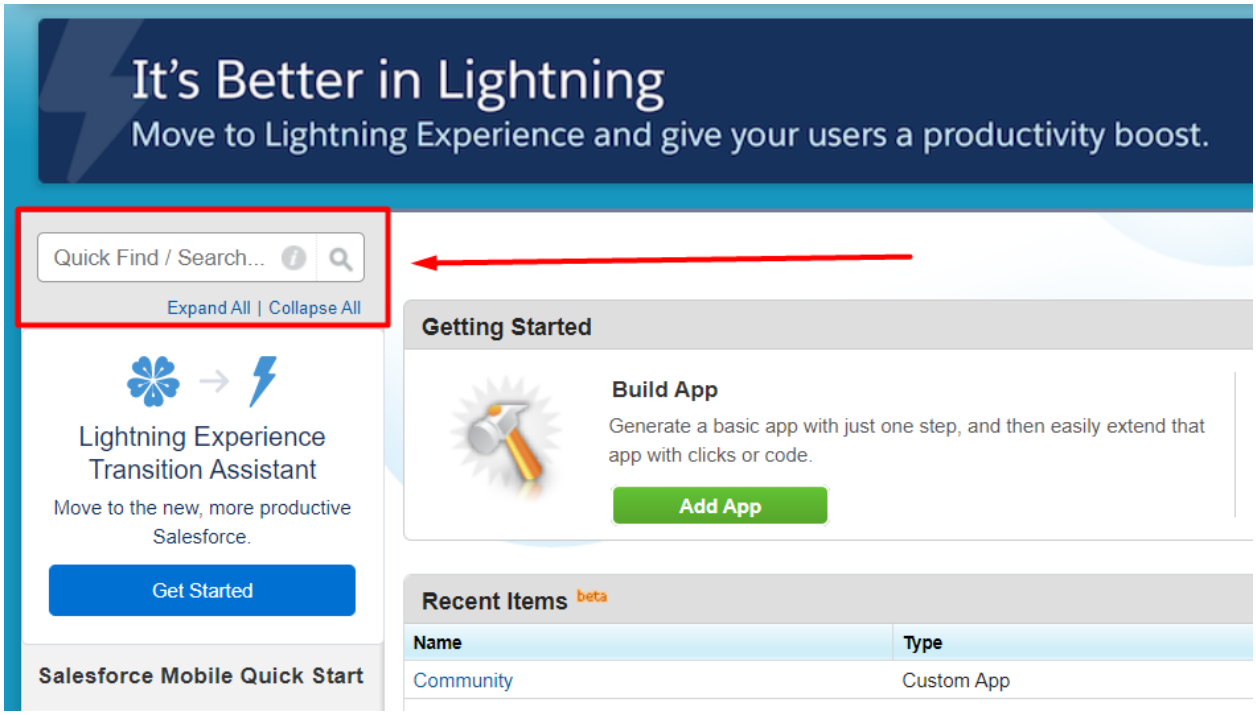
Step 7: Just with a click on the navigation bar you can switch between several apps.As you click on opportunities you will be directed to the next page having all the details.

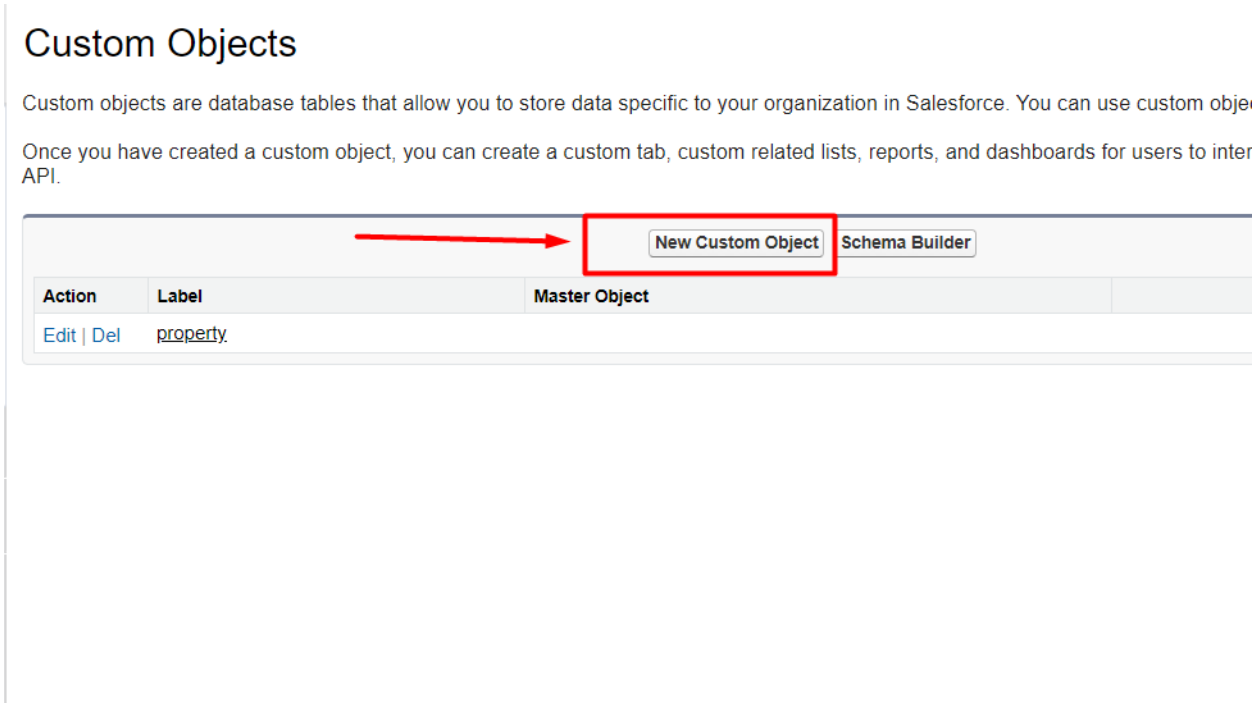


Step 8: As you are directed to the next page you will see an option for all opportunities when you click on it and see as per list view. As you scroll down you will see other options as well like reports, quarterly summary etc. On salesforce classic all the details are present on a single page unlike salesforce lightning.



Step 9: Now as you move to the setup available on the top right corner you click on it you will be moved to the next page where you can see the quick find option which can be used to search for any object either custom or standard.





Step 10: Now if you want to create a new object you can search for it by typing object in the quick find bar you will see it under bar create. click on it you will be directed to the next page where on the top you can see the option of creating a new object.
