

In this lecture we will explore more about previously learned topics standard and console navigation.

**Step 1:** You can either choose standard navigation or console navigation as per your customers requirement. Now if you search app manager in the quick find tab and click open this app manager.

**Step 2:** As we open app manager and try to create a lightning app, say for example we are putting the App name as “Test” and clicking on next.

**Step 3:** As we click on the next page navigation style is available so we can choose either standard or console.

New Lightning App

App Options

Navigation and Form Factor ⓘ

\* Navigation Style

☒ Standard navigation  
☐ Console navigation

\* Supported Form Factors

☒ Desktop and phone  
☐ Desktop  
☐ Phone

Setup and Personalization ⓘ

Setup Experience

☒ Setup (full set of Setup options)  
☐ Service Setup

App Personalization Settings

☐ Disable end user personalization of nav items in this app  
☐ Disable temporary tabs for items outside of this app

✓

**Step 4:** So if you choose standard navigation your created app will have the UI of standard navigation as explained previously in the lectures and if you go with console navigation your app will have UI of console navigation also explained in detail in the previous lectures.
