

Lecture 2: Exploring lightning salesforce:

In this lecture you will be comparing the lightning salesforce with the classic salesforce and exploring all the differences.

Step 1: In order to switch back to salesforce lightning you have click on the the option on the top of your screen present on the homepage.

Step 2: As you click on the option you will be directed back to the salesforce lightning interface here you will be able to notice that the UI of lightning is completely different from the classic like you will notice that all the apps are present already in the navigation bar such as opportunities, leads, account etc.

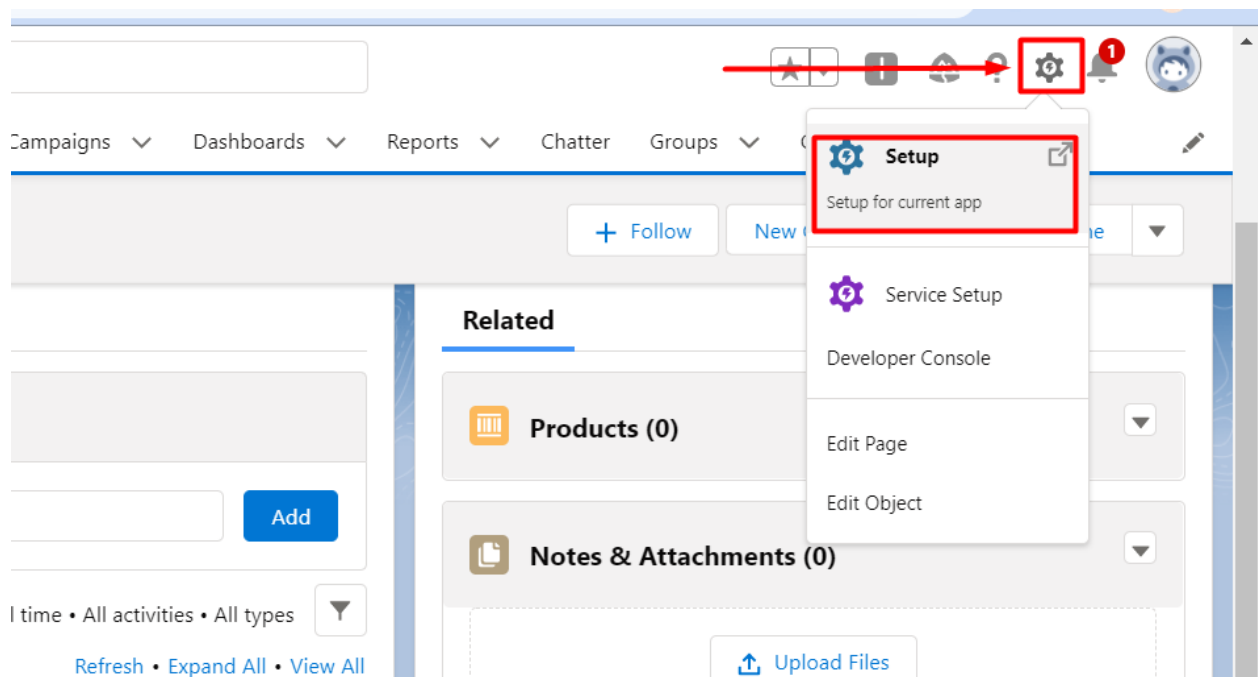

Step 3: As you click on opportunities you will only be able to see list view information and if you open a particular record it is also divided into components such as activities, details, chatter etc. In salesforce lightning everything is divided into components.

The screenshot shows the Salesforce Lightning interface for an Opportunity record. The top navigation bar includes 'Sales', 'Home', 'Opportunities', 'Leads', 'Tasks', 'Files', 'Accounts', 'Contacts', and 'Camp'. The 'Opportunities' tab is selected and highlighted with a red box. Below the navigation bar, the Opportunity record header is displayed, including the Opportunity icon, the name 'Burlington Textiles Weaving Plant Generator', and the account name 'Burlington Textiles Corp of America'. The record details show the Close Date as '3/19/2021', the Amount as '\$235,000.00', and the Opportunity Owner as 'astha gupta'. Below the record details, there is a progress bar with six green steps, each containing a white checkmark. At the bottom, there are three tabs: 'Activity', 'Details', and 'Chatter'. The 'Activity' tab is selected and highlighted with a red box. Below the tabs, there is a section for creating a task, with options for 'New Task', 'Log a Call', 'New Event', and 'Email'. A text input field with the placeholder 'Create a task...' is also visible.

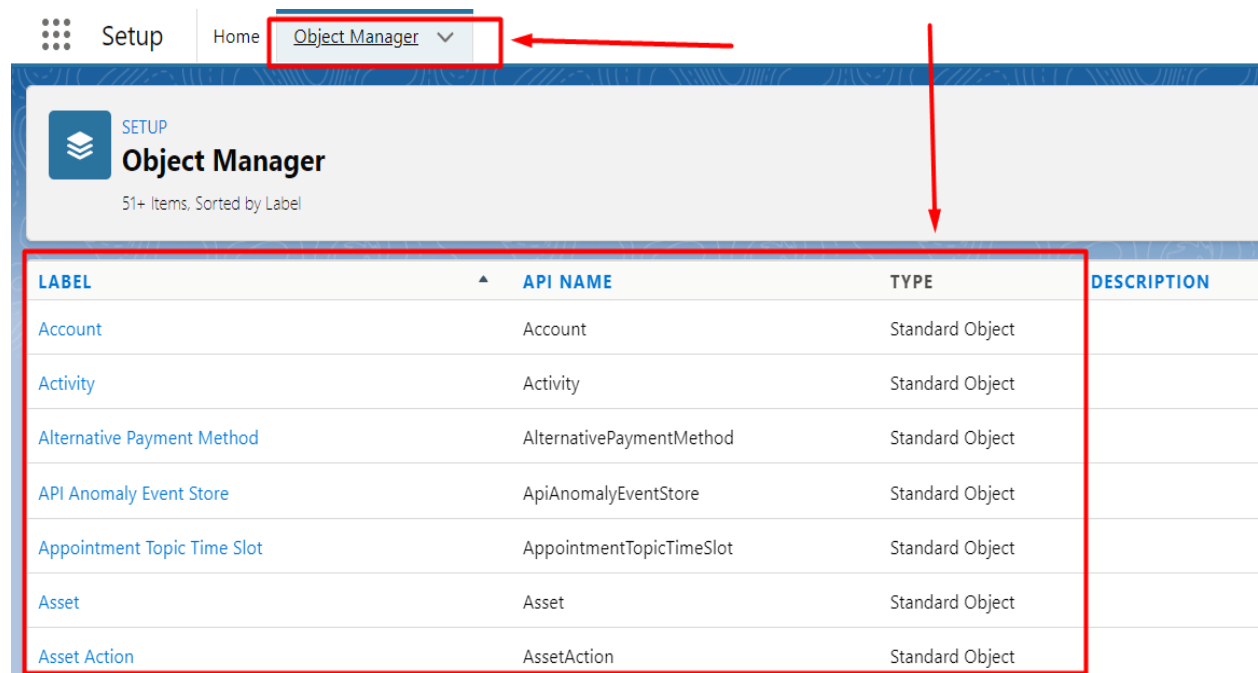

Step 4: Similarly on the right hand side you will be able to see all the related list.

The screenshot shows the Salesforce Lightning interface for the Opportunity record, focusing on the Related list. The 'Related' tab is selected and highlighted with a red box. The Related list displays four sections: 'Products (0)', 'Notes & Attachments (0)', 'Contact Roles (0)', and 'Partners (0)'. Each section has a corresponding icon and a dropdown arrow. The 'Notes & Attachments (0)' section is expanded, showing a dashed box for uploading files. A button labeled 'Upload Files' is visible, along with the text 'Or drop files'. The left sidebar contains a search bar, an 'Add' button, and filters for 'All time', 'All activities', and 'All types'. There are also links for 'Refresh', 'Expand All', and 'View All'.

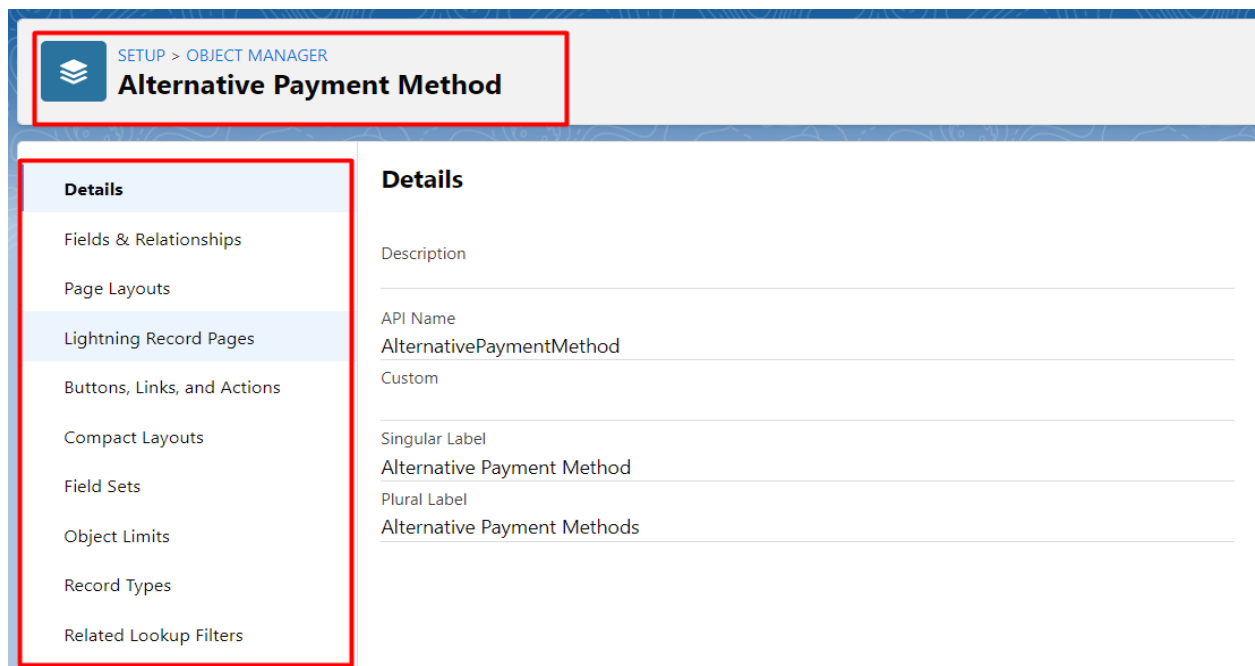

Step 5: Now if you want to move to setup you have to click on the gear icon given on the top right side of the page and click on setup.

Step 6: Now if you want to search anything in the salesforce you can search it in the quick find option while if you want to see different objects either standard or custom you can click on object manager and you will be able to see the list.

Step 7: Now if you click on any object all the details related to that specific object are available on the left hand side altogether. In this way the classic experience is different from the lightning experience.

Step 8: If you want to switch applications in salesforce lightning so here we have app launcher icon present on the top left corner if you click on it and click view all you will be able to see all the available applications either standard or custom.
