

Lesson 1 Launching your developer edition instance

In this lesson, you will learn about creating an account on salesforce. The steps for creating a salesforce account are as follows :

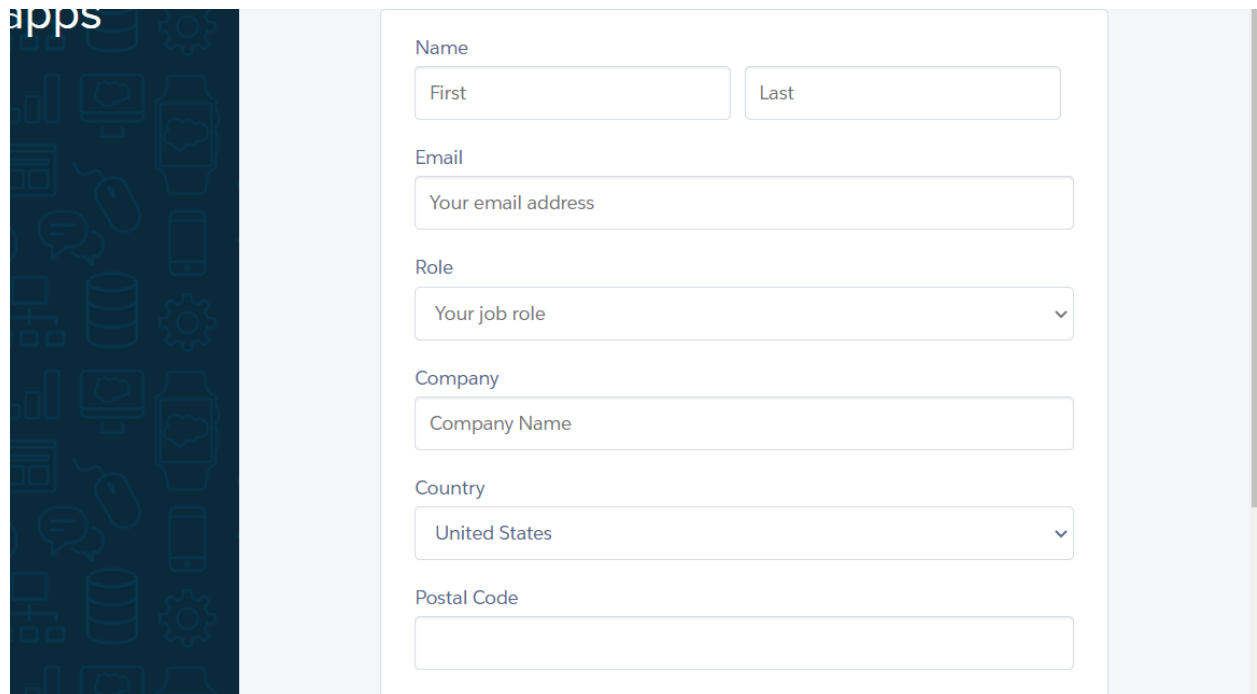

Step1: To create a salesforce account, the first step is to open a browser and type the following URL developer.salesforce.com

Step 2: After opening the page, you will see the options for “Login” and “Sign up’.’ for creating a new instance you need to click on the sign up option

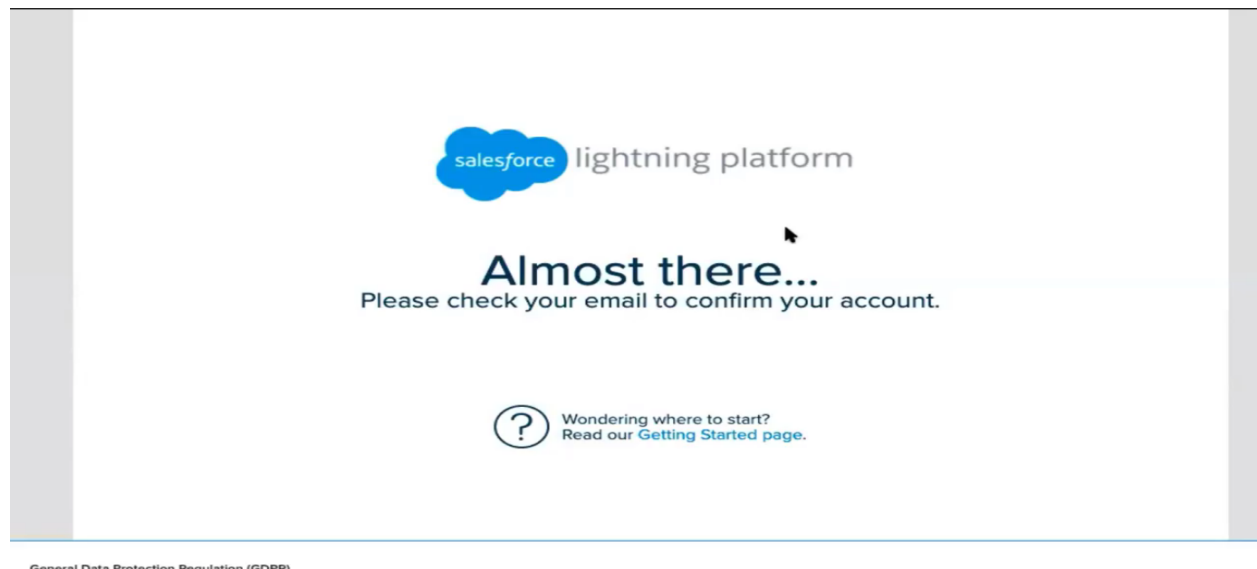

Step 3: Once you click on the signup option, you will be directed to a page to create your account. You will have to fill in the required information, and a link will be sent to your email, which will be used to create a password. After filling in the information, click on the option “Sign me up.”

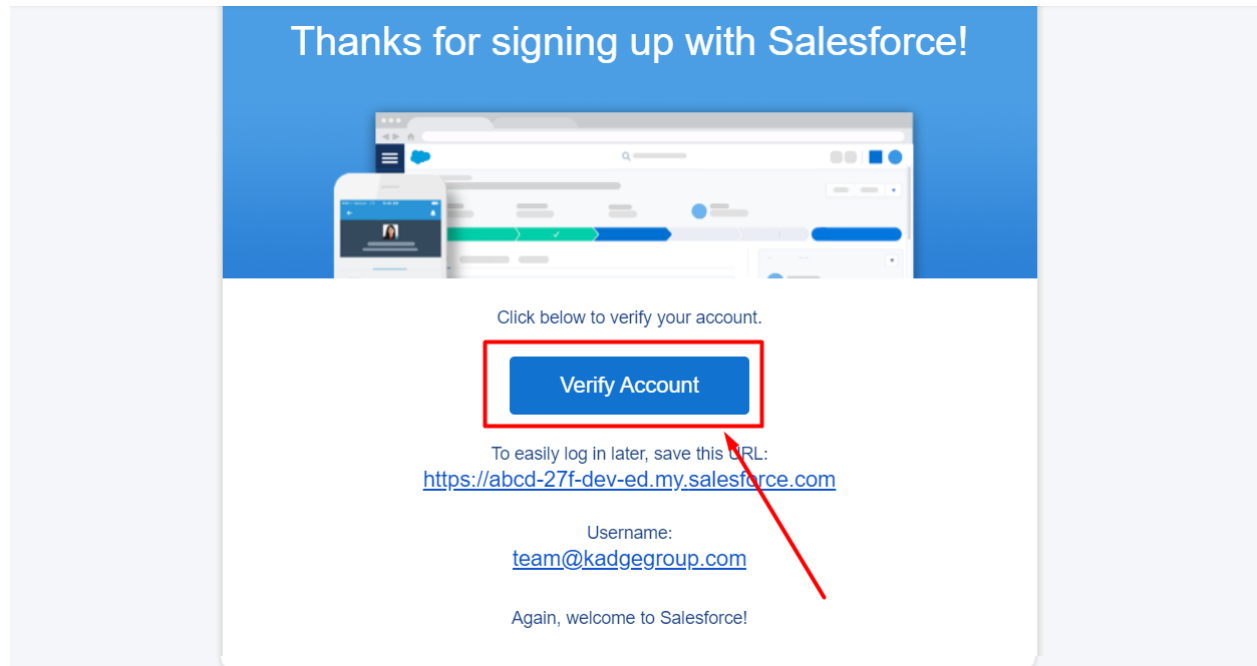

The screenshot shows a registration form for the Salesforce Lightning Platform. On the left is a dark blue sidebar with white icons representing various business and technology concepts. The main form area is white and contains the following fields:

- Name:** Two input boxes labeled "First" and "Last".
- Email:** A single input box labeled "Your email address".
- Role:** A dropdown menu with "Your job role" and a downward arrow.
- Company:** An input box labeled "Company Name".
- Country:** A dropdown menu with "United States" and a downward arrow.
- Postal Code:** An empty input box.

Step 4: once you have clicked on the sing up option, it will direct you to the page where you will see a message asking you to check your email to confirm your account

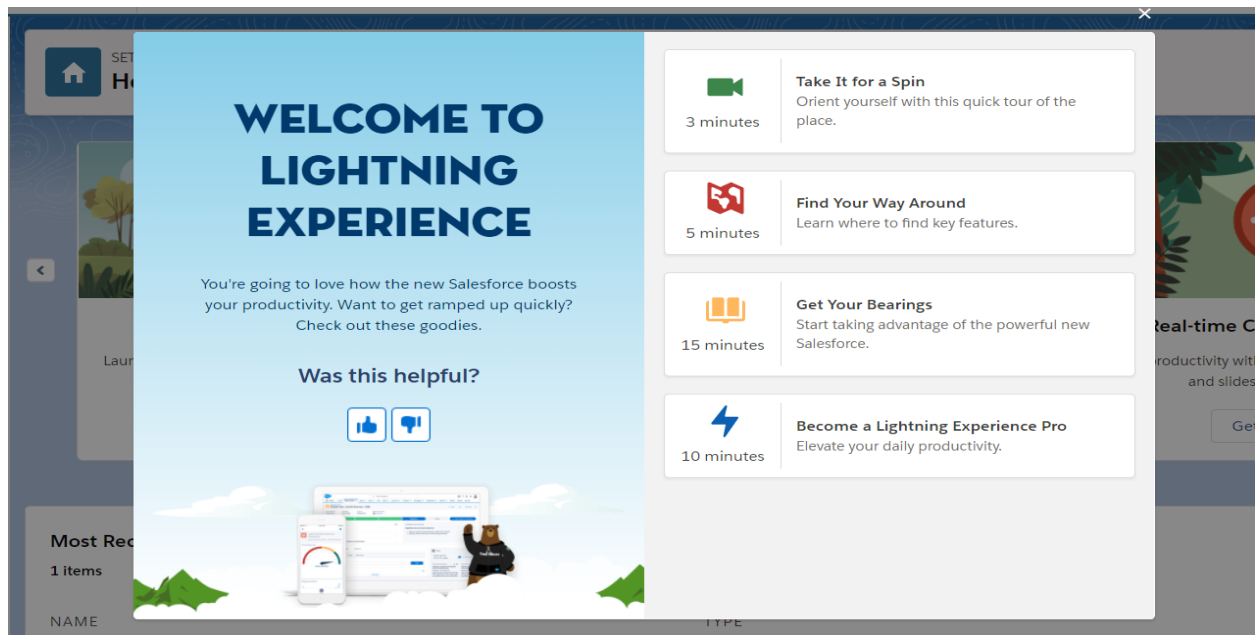

Step 5: After you get a confirmation email, you need to click on the “Verify Account option,” which will direct you to the page where you will be required to set up a new password.

Step 6: To create a password, please you are supposed to read the instructions carefully. After typing in your new password, you will have to select a security question. Once selected, click on the “change password.”

The screenshot shows the "Change Your Password" form. The title "Change Your Password" is at the top. Below it, the text reads "Enter a new password for sfdcconfigurationsorg@gmail.com. Make sure to include at least:". There are three radio button options: "8 characters", "1 letter", and "1 number". Below these is a red arrow pointing to the "1 letter" option. The form has two password fields: "* New Password" and "* Confirm New Password". Below these is a "Security Question" section with a dropdown menu showing "In what city were you born?". At the bottom is an "Answer" field.

Step 7: Once you have clicked on the change password, you will be directed to the launching setup page to see a welcome card with all the important instructions.

Step 8: On the launching setup page, you will get to know about object manager, where you will be able to see all available objects discussed later in the other videos. You will also find a tab for “quick search” where you can search for various settings related to salesforce.
