**Lecture 4: Hiding, viewing and Removing objects:**
In this lecture you will learn about how you can hide, view and remove objects.

Step 1: In order to hide objects you can see there is a option available on the top of the screen " view objects" as you click on it you can see three options available hide object, hide legend and display element name you can click and enable the setting you can also disable it later.
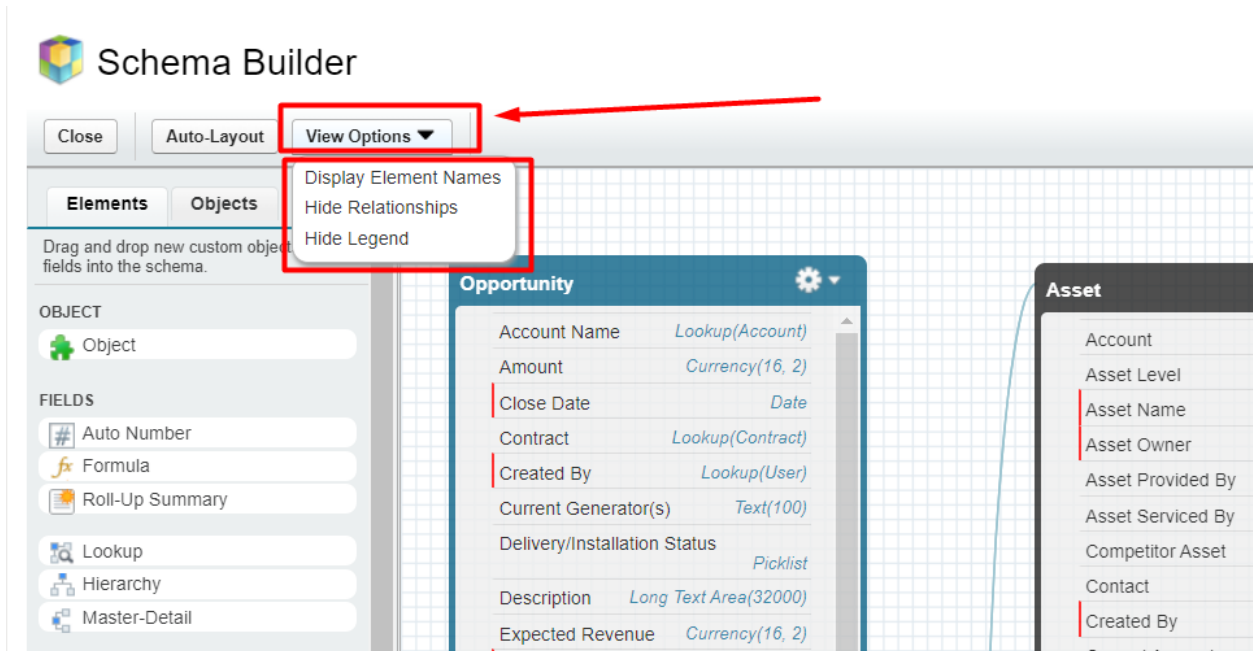

Step 2: Now if you click on the gear icon present on the objects you can see several options such as hide object, view object and view page layout.
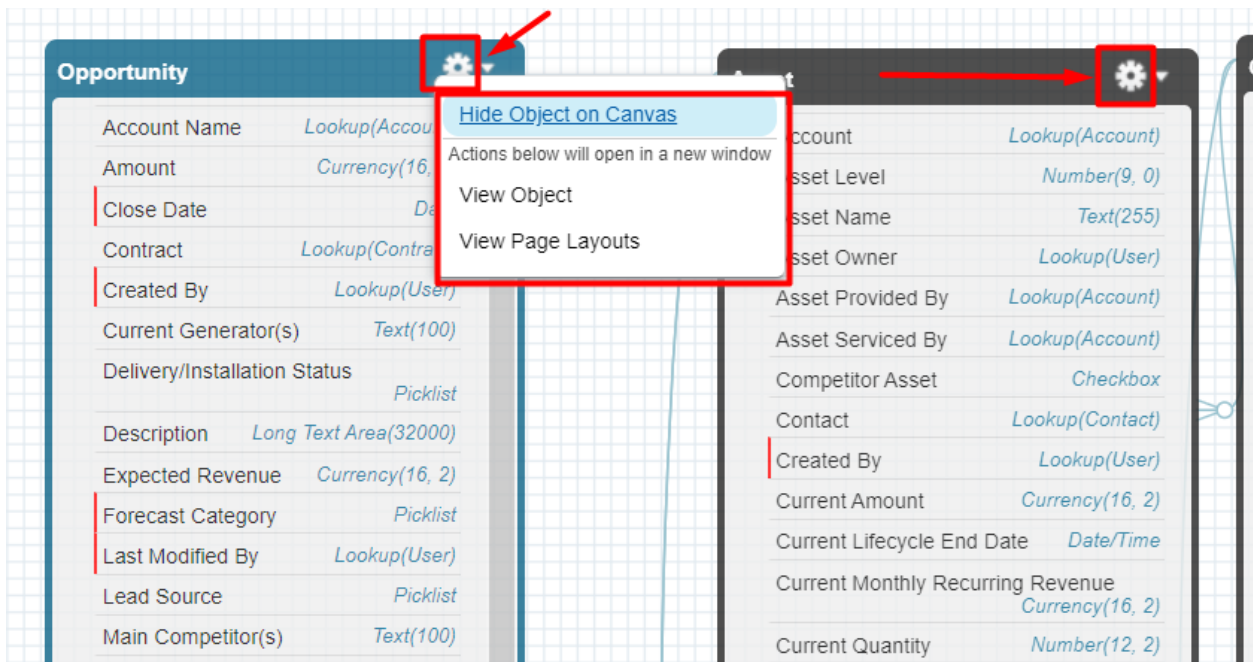

Step 3: If you click on the option view object then the same object will be opened in the new tab under object manager.example if you click on opportunity and view object then the object opportunity will be opened in the new tab under object manager with all the details.

SETUP > OBJECT MANAGER
Opportunity

Details	**Details**
